

Welcome – Thanks for coming!!

EFFECTIVE June 8, 2022

These practices are in accordance with CDC and IDPH guidelines.

There are no designated visiting hours however we would ask you to be respectful of our residents' home and not visit late in the evening or early in the morning when the residents may be sleeping.

Arrival at the West entrance

- Pump some of our life-saving sanitizer on your hands and rub it in!
- Grab a fresh mask in the entrance – bend it to fit securely over the bridge of your nose and stretch to fit below your chin. Please keep your nose and mouth covered during your entire visit.
- Our receptionist is on duty from 8:00 am to 6:00 pm. In order to enter the building outside of those times, please press the button on the black box above the key pad in the West entrance. This will alert the staff at the Downstairs East nurse station that you are at the door. You can talk to the staff through this black box and once they are able to identify who you are, they will unlock the door for you remotely. Please enter and proceed with the normal screening steps as listed below. If no one responds to unlock the door, please call the Home at 309-467-2311 and ask for the Downstairs East nurse station and the staff will unlock the door for you.
- Proceed to the screening kiosk to answer the COVID-19 screening questions, get your temperature taken and get your printed screening tag. If you are positive for COVID-19, please do not visit for 10 days after symptom onset. If you have any of the signs and symptoms of COVID-19 listed below or exposure to someone with COVID-19 infection in the past 10 days, you may not be able to visit at this time.

Fever of over 100.0

Chills or shaking with chills

Loss of taste or smell

Nausea, vomiting or diarrhea

Cough

Muscle or body aches

Congestion or runny nose

Respiratory symptoms or shortness of breath

Sore Throat

Headache

Fatigue

During Your Visit

- We will provide a visiting area, typically your loved one's room or a designated visiting area in a common space indoors or outdoors.
- **Please go directly to and stay in the designated visiting area. Do not linger or stop to talk to others along the way. Please maintain that 6 feet distance from other residents as well as staff.**
- Sanitize your hands often, especially after touching surfaces or coughing/sneezing.
- If you have a need while visiting your loved one, please press the call light and one of the nursing staff will be happy to assist you.
- The safest practice is for residents and visitors to wear face coverings or masks and physically distance, particularly if either of them is at increased risk for severe disease or are not up-to-date with all recommended COVID-19 vaccine doses. Please read below for the specific requirements for wearing face coverings or masks and physically distancing for indoor and outdoor visits.

INDOOR VISITS

- If the resident and all their visitors, are up to date with all recommended COVID-19 vaccine doses, the resident can choose NOT to wear a face covering or mask while in the resident's room and may choose to have physical contact with their visitors.
- At this time, visitors are required to continue wearing a face covering or mask **INSIDE** during their entire visit.

OUTDOOR VISITS

- Residents and visitors, regardless of vaccination status, are not required to wear a face covering or mask when outdoors.
- Residents and visitors who are not up to date on their recommended COVID-19 vaccine doses should still physically distance from other residents and visitors.

Come back soon!

- One last VERY IMPORTANT reminder – If you develop signs or symptoms of COVID within 72 hours after your visit, please notify Holly Bauman, DON immediately at 309-208-0330.
